**Ministry Teaching and Training Center**  
**Matthew 28:19-20 Vision Planning**  
**Mercy Transport of Organs, Patients, Families**

"And the multitude of the believers were of **ONE HEART** and one soul..."

Acts 4:32

**No one does this ... YET ...**

It has been said, "**The best kept secret in emergency medicine is the charitable airplane flight to the hospital!**"

In 1998, **One Heart Missions Services** founder, Chris Pfaff, underwent not just one, but two **life-saving liver transplants**. And a very successful third in 2017!

While still in the hospital recovering, and *being a pilot* himself, Chris planned what would soon become the ministries and services of **One Heart Missions Services**.

Since its formation, **OHMS** has flown over a hundred "**lifeguard**" and "**compassion**" patient flights to & from home & hospital for life-saving transplants and medical care.

However, a **new need** has made itself quite apparent. It is unto this need that **OHMS** humbly and urgently asks your help.

**OHMS** is now **frequently asked to fly patient flights, but of much longer distances because no one else is regularly able to fly such long-distance charitable flights.**

These patient flights *require* that we **acquire our own airplane** designed with a variety of mission-specific criteria to meet needs unique to each long-distance flight.

**Please: Help us help others in need.**

We need one of these ...

### POTENTIAL AIRPLANES:

- **Piaggio Avanti II P180** ... Optimal! (\$9M)
- **Eclipse 550 Jet** or **Jetstream** T-Prop (\$5M)
- **Cessna Conquest II** ... pictured Here! (\$3M)
- **Cessna 414A** or **Piper Navajo** ... non-TP (\$1M)

### WHAT IS THE NEED?

**OHMS** has been asked, but has had to decline many emergency and urgent care flights because we do not yet have access to an adequate airplane.

God has blessed us with a pilot having the experience needed, now we need the plane! That's where we urgently need your help.

Recently, we've had to turn away *all* of these critical care urgent patient flights:

New Jersey - Florida  
Pennsylvania - SC, NC, NY, MD, MA, FL  
NY/NJ/MO/KY/AR/TX - PA International Needs  
Kids, cancer patients, transplants, etc., etc....

### **We need an airplane with very specific mission capability criteria, that is able to ...**

- Fly above, around, or through Weather - Many life-saving missions are  *canceled*  due to lack of proper aircraft or pilot training and proficiency. However, **OHMS** can fly even when weather is *not* perfect!
- Be Pressurized and Oxygen Equipped - Some patients require pressurization or O<sub>2</sub>.
- Fly Fast! - We often must fly east first, to pick up a patient or an organ, only to fly back west to the transplant hospital. Almost all surgeries are time-critical.
- Use a Stretcher - We're constantly asked to fly patients who must recline.
- Seat a Family - Even when a stretcher is in use. Family members often accompany the patient. They are *needed* in almost all cases.
- Takeoff and Land at very small airports - We often need to fly into and out of runways of less than a half-mile in length.
- Twin-Turbo-Prop or Jet - Optimal multi-purpose.

### THE GOAL:

- **OHMS** seeks \$5,000,000 for this project.
- **Suggested Donations:** \$500 per Family (1/10,000)  
\$5,000 from a Business/Church/Group (1/1,000)  
\$50,000 as a Major Sponsor or Foundation (1/100)

### WHAT YOU SHOULD DO:

- Please, **write a check**, right now while it's on your mind, to "**One Heart Missions Services**" and mail it **today**. Thanks! (or...) 
- **Go online to PayPal.com** and use your PayPal account or credit or debit card and **send money to "Donate@OHMS.org"**. 
- Call two, -no: call *three* friends. Then email five more friends! Please: honestly, humbly, & respectfully ... 
- Ask *each* of them to please *also* donate in support of the services available from **One Heart Missions Services**.
- **Thank** your friends for joining you in your combined and gracious donations. 

## The way it's *supposed* to happen:

It's 4AM. I hear the phone: "Ring...RING."

"Good morning, this is  
**One Heart Missions Services.**"

"Hi. The hospital just called us. *It's time.*  
Our son needs to get to Pittsburgh right away  
for his liver transplant. *Can you fly us?*"

"Sure. I'll be at your airport in an hour."

"Thank you so much."

And a couple hours later, that twelve-year-old  
boy underwent a life-saving liver transplant.

## How it happens *way* too often:

Daytime: "Ring."

"Good afternoon, this is  
**One Heart Missions Services.**"

"Hi, I'm a social worker with a hospital in  
Denver, Colorado. We have a patient who  
has a neurological problem that can only be  
treated in Philadelphia, Pennsylvania.

"The patient will need a respiratory therapist  
during the flight to monitor him, as the  
patient needs sedation to fly."

"It sounds like you *really*  
need an air ambulance."

"Yes, it should be. But the patient's family  
has no money, and his insurance won't pay  
for a flight to a hospital in another state.

*That's why we called you.*"

"I wish I could simply say 'yes'.  
Sadly, **One Heart** can't...yet.  
We're still seeking donations  
for the kind of airplane we  
need for this kind of flight."

*Help us, will you? Donate@OHMS.org*

ONE HEART MISSIONS SERVICES  
60 Reinaker Road – Danville, PA 17821

One Heart Missions Services

asks you to ...

Ask yourself  
this very, very,  
very important  
life-and-death  
question:

*What if YOU were  
in need of a heart  
transplant...NOW?*

If **you** got "the call", ...

*who would fly you*

to your heart, or liver, or lung  
transplant ...

... **RIGHT NOW?**
